SUBMISSION INFORMATION

Camelid, Goat, Sheep Faecal Testing Service

A minimum of 4g is required for testing, equivalent to 6 -8 adult faecal beans (in case further investigation or repeat testing is required).

Instructions for submission:

- Collect samples from individual animal (*unless previously discussed*)
- Collect samples that have been freshly Excreted (*this needs to be observed to ensure correct sample for each animal!*)
Use glove provided.
- Place the sample into container provided fill pot as much as possible, and place into small sealable bag provided. Label the sample with the animal identification (*name or number*) and the date of collection.
- There is a comment box on the submission form if you have any particular concerns (*e.g. recent weight loss, diarrhea, soft stool etc*) if recently given Anthelmintic please state what was used and when.
- Please body condition score the animal at the time of collection (*Please use a scale of 1-5*)
- Place all samples in Pre addressed envelope provided. Please try to keep as flat as possible (*so package can fit through Royal Mail large letter guide*) Include the submission form attached with your samples and a cheque for **£20** per sample *made payable to Sarah Dakin*.
- If submitting an urgent sample without kit place sample in sealed freezer bag it is fine to squash flat Double bag and place in an envelope this will then also be posted as a large letter as the kits.
